

Air One broadcasts in our area over the 88.1 band. We love having this station available to us because it serves a purpose. This station is a refreshing alternative to the local stations and their music agenda. The music played on this station is positive and uplifting. The loss of this station would be another blow to the independent spirit that made this country great. Where else in our world could a radio station exist that is public supported, commercial free, with no corporate underwriting? The Air One network is totally listener supported. Please keep that in mind as you make your decision. May God Bless You.
